

Donaldson Coal Abel Mine CCC Meeting

11th September 2023

Abel Update

- Abel mine continues on Care and Maintenance
- Areas within Abel mine are now being used by a third party (APA) for the *Kurri Kurri Lateral Pipeline Project* that is scheduled for commencement in Q4 2023. Abel is being used to store pipes and for administration activities.
- The gas pipeline will run through the Abel/Donaldson site, roughly adjacent to the Hunter water pipeline.

Kurri Kurri Lateral Pipeline Project

- Blue line is the alignment of pipeline.

Environmental Update

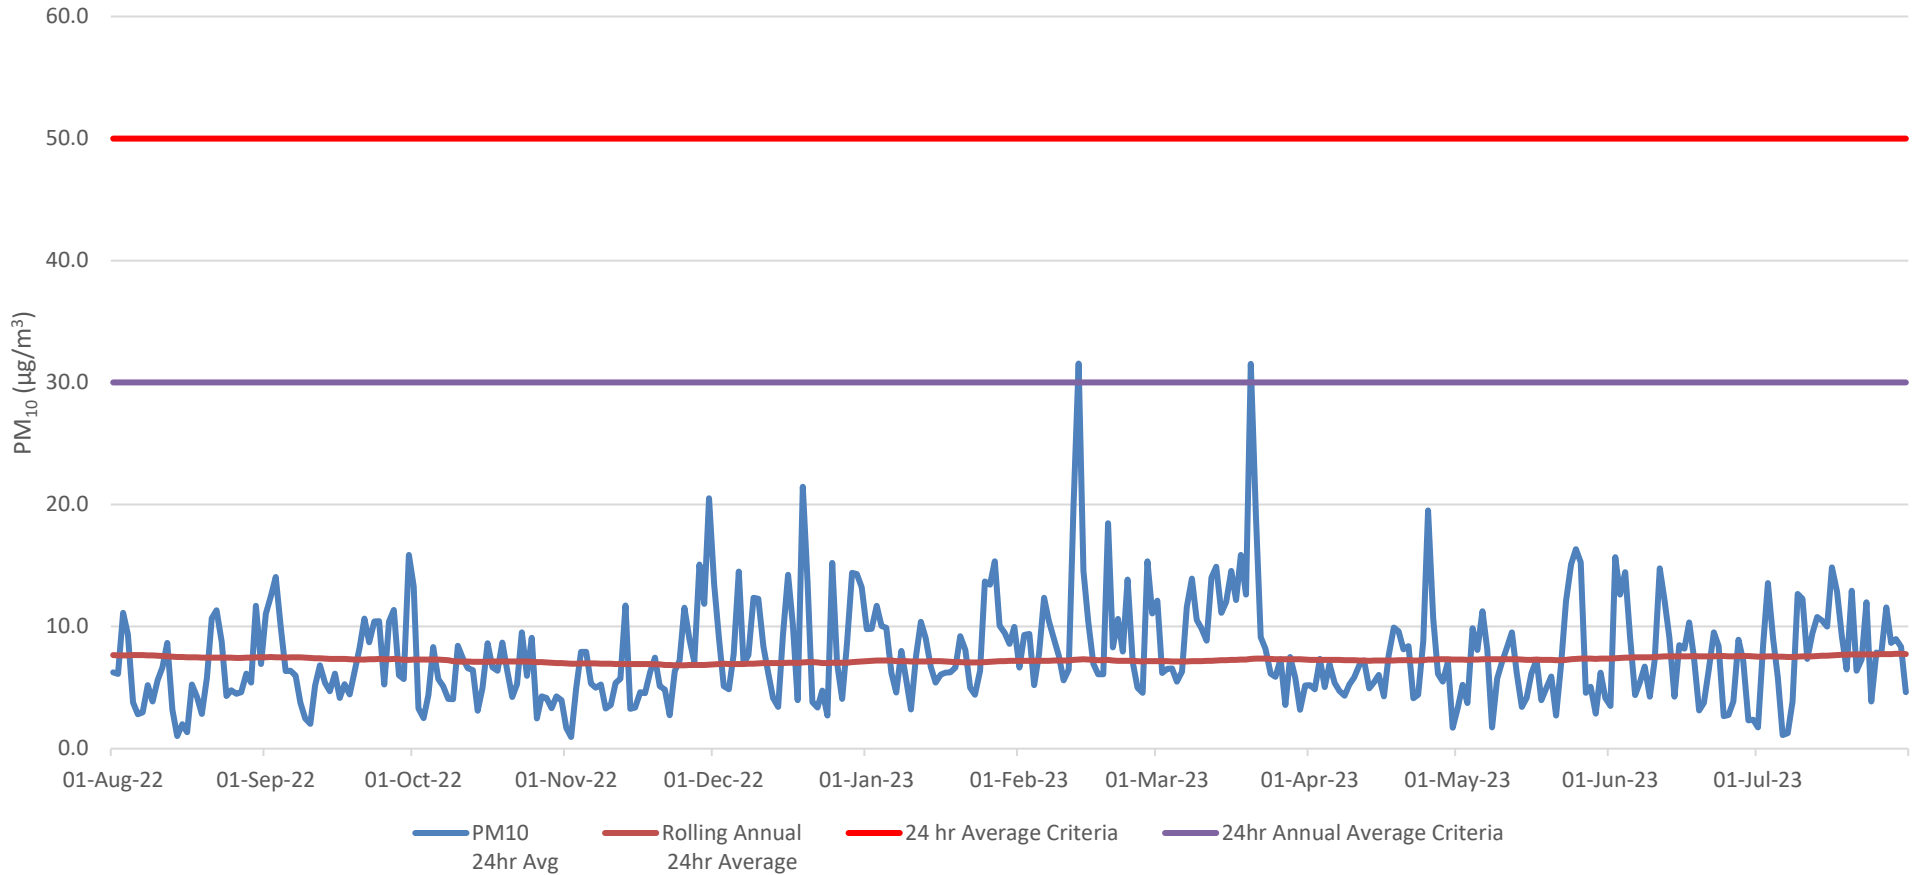

- No Community Complaints or Environmental Incidents since last meeting.
- The Environment Protection Licence (EPL) Annual Review has recently been submitted with 4 identified non conformances.
 1. Dust monitoring continuous recording disruption – power
 2. Surface water samples not collected due to dry sampling points.
 3. Ground water sample not collected due to blockage in bore.
 4. One water sample not tested for one analyte (fe) on one occasion due to a lab error.
- Rehabilitation Objectives and the Final Landform and Rehabilitation Plans for Abel and Donaldson were recently Approved by the Resources Regulator.

Environmental Monitoring Update

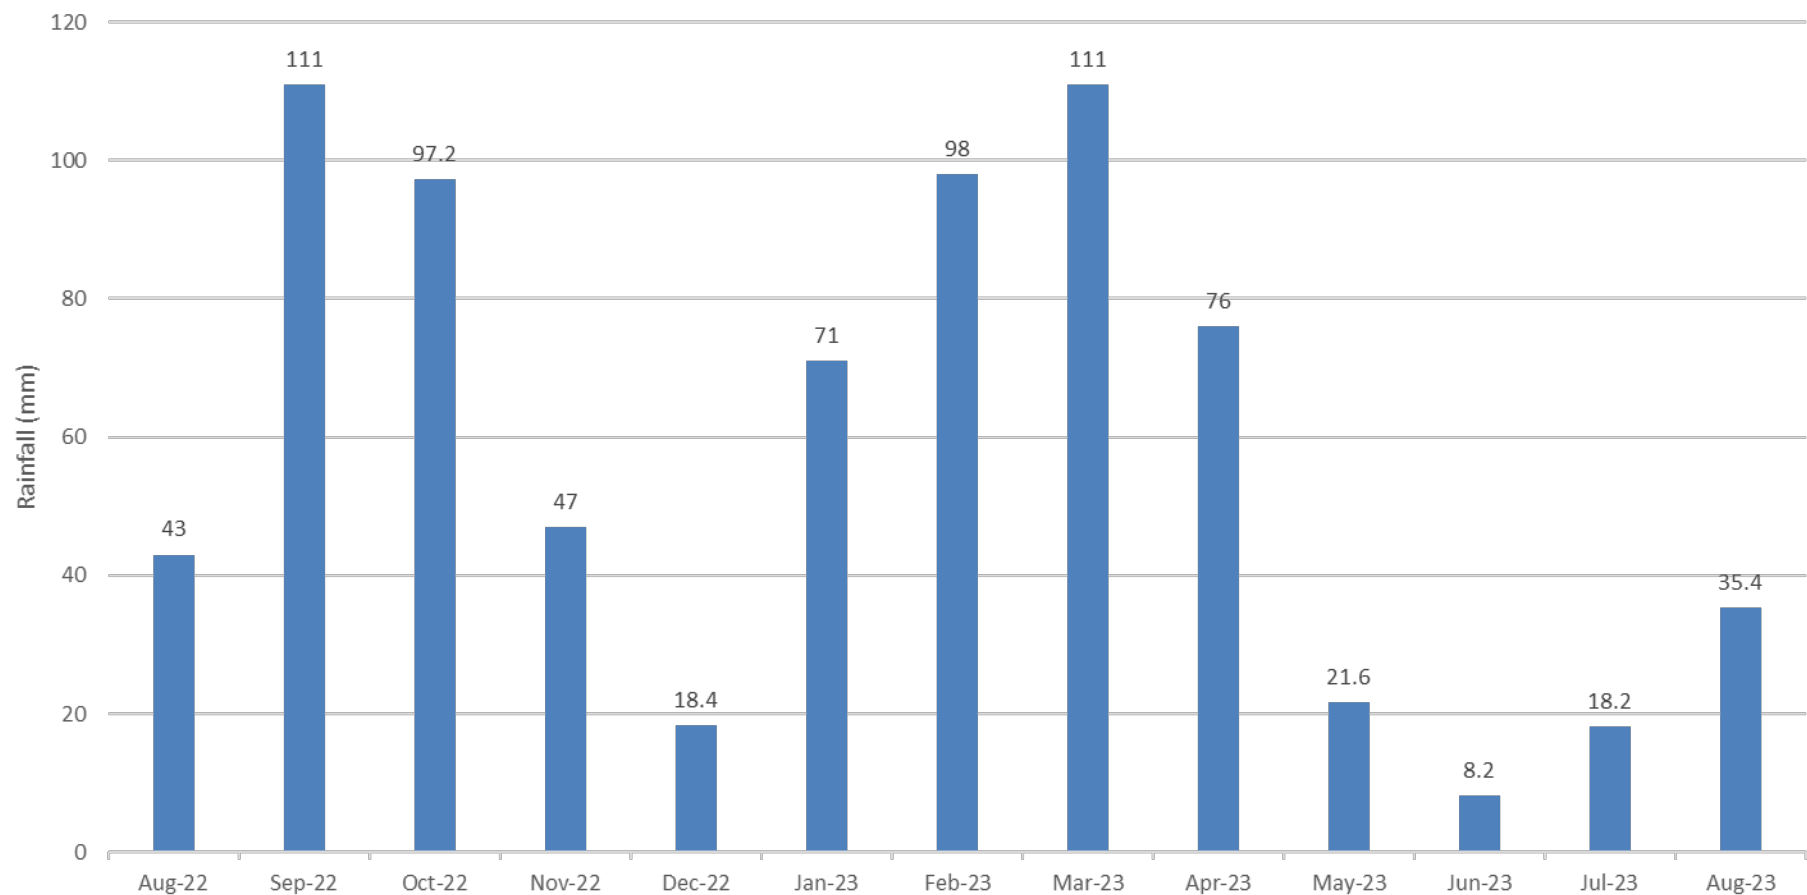

- Monitoring has remained consistent throughout the period with no additional monitoring taking place.
- A campaign to assess the rehabilitation status of historical exploration boreholes has occurred over the period with a number being signed off by the Resources Regulator as being rehabilitated.
- The Donaldson Coal website continues to be updated with relevant documentation regarding environmental monitoring data, management plans and annual reports.
